EQUINIX

FEDERAL GOVERNMENT DIGITAL TRANSFORMATION

Empowering Federal Agencies with Secure, Agile, and Connected Digital Solutions.

Achieve edge-to-cloud transformation with Equinix Digital Core, Digital Ecosystem and Digital Edge

Equinix serves as a crucial enabler for federal government agencies, accelerating digital transformation by providing secure, seamless, and scalable digital infrastructure solutions.

Accelerating Federal Government Transformation

Equinix offers a diverse portfolio of dynamic, on-demand digital interconnection services, uniquely capable of expediting digital modernization success for government agencies. Our solutions simplify complex infrastructure systems, optimizing placement and providing access to essential digital and partner ecosystems.

Global Data Center Environment

The public sector digital transformation journey is advanced by gaining proximal access to important ecosystems, providing optimal access to relevant business communities and digital marketplaces while opening doors to new opportunities within the digital value chain. Equinix connects federal agencies to ecosystems of providers, SaaS solutions, and mission partners, along with industry-specific, API-based applications supporting collaboration, innovation, and business agility.

Equinix's global data center environment is the heart of our offering, providing a broad array of physical and virtual building blocks spanning network, compute, and storage capabilities—now agencies have the freedom to choose what suits their unique needs. The Equinix global footprint encompasses 240+ interconnected data centers across 71 metros, spanning 32 countries and 6 continents, ensuring access wherever it's needed.

The Power of Equinix

Platform Equinix delivers the advantages of the cloud ecosystem with the capabilities of the leading global interconnection platform. This translates into enhanced productivity, unmatched global reach, and secure, direct connectivity to an extensive network of carriers and cloud providers. Equinix ensures robust security through comprehensive measures, extending to regulatory compliance with adherence to ISO, FISMA, AICPA SOC, PCI-DSS, HIPAA HITECH, and NIST 800-53 standards.
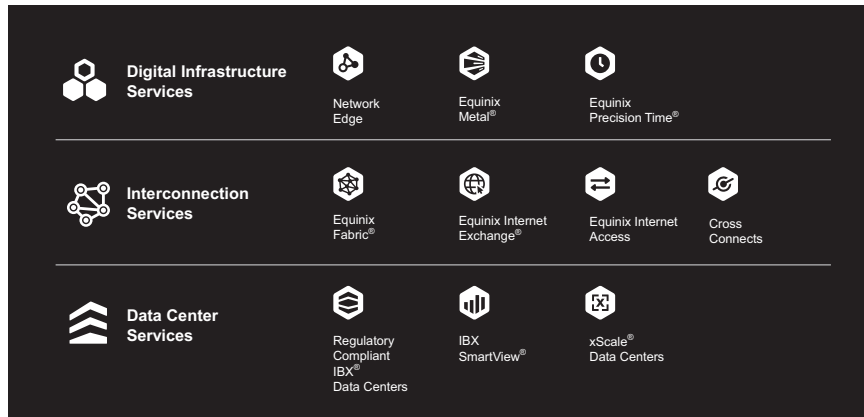

Flexible solutions to keep you in control of the cloud

- **Maintain Control:** Retain ownership of data, security policies, and compliance standards.

- **Expand Reach:** Extend your network to critical locations for improved performance.

- **Adapt Infrastructure:** Relocate or consolidate data centers as needed.

- **Data Separation:** Store data securely while accessing the cloud for compute power.

- **Ownership of Security:** Set and enforce security standards and policies.

- **Smooth Migration:** Transition from CAPEX to OPEX, leveraging current contracts and providers.

- **Standards and Compliance:** Meet rigorous government standards, including ISO, FISMA, AICPA SOC, PCI-DSS, HIPAA HITECH, and NIST 800-53.

Digital Infrastructure Services Tailored to Government

Equinix understands Federal agency requirements, and delivers digital solutions to meet the challenge:

Digital Infrastructure Services
- Network Edge
- Equinix Metal®
- Equinix Precision Time®

Interconnection Services
- Equinix Fabric®
- Equinix Internet Exchange®
- Equinix Internet Access
- Cross Connects

Data Center Services
- Regulatory Compliant IBX® Data Centers
- IBX SmartView®
- xScale® Data Centers

Equinix is uniquely positioned to help agencies succeed with a proven portfolio of additive, on-demand digital interconnection services.

FEATURES
- Data center consolidation & peering
- Supply chain digitization
- COI collaboration
- SD interconnection, on-demand cloud & network services
- Commitment to 100% clean and renewable energy
- Connect directly to thousands of networks
- Secure data centers, 24/7 on-site security
- Transition from CAPEX to OPEX model

BENEFITS
- Overcome fragmented infrastructure
- Harness the cloud ecosystem
- Secure environment data sharing
- Simplify operations, reducing complexity and cost
- Align agency operations with green initiatives
- Achieve the fastest, most scalable cloud interconnection
- Safeguard systems with robust physical & digital security
- Reduce connectivity costs

The benefits of an interconnected government are within reach. Equinix is dedicated to facilitating a seamless transition towards greater security, simplified dynamic interconnection, fast and scalable cloud connections, and multicloud, multiregion accessibility. As government agencies increasingly embrace cloud solutions, Equinix provides the foundation to maintain control, enhance performance, and drive cost efficiency. With Equinix, government agencies can navigate the evolving digital landscape with confidence, harnessing the power of proximity and connectivity to shape a more agile, secure, and efficient future.

About Equinix

Equinix began as the neutral peering exchange and colocation provider for the major telecom networks, but has evolved to become the optimal global interconnection platform for digital services and scalable cloud. Equinix is the premier cloud ecosystem, with direct access to Amazon Web Services, Microsoft Azure, Oracle Cloud and government clouds.

We enable more than 330,000 interconnections between our customers, along with thousands of interconnected cloud and managed IT service providers, where government agencies get all the benefits of the cloud without security concerns, internet performance bottlenecks or the risk of vendor lock-in.

On Platform Equinix, agencies gain unmatched choice and flexibility along their journey to the cloud and for the digital transformation of government.
